9 orange tiles = preset tiles
51 green tiles = select yourself (portrait tiles)

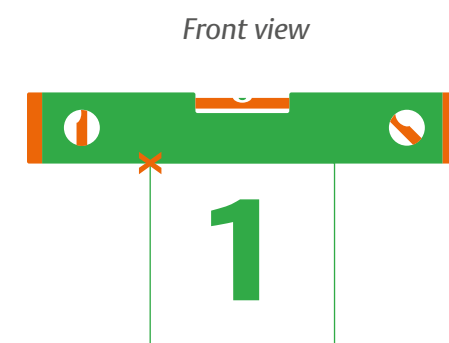

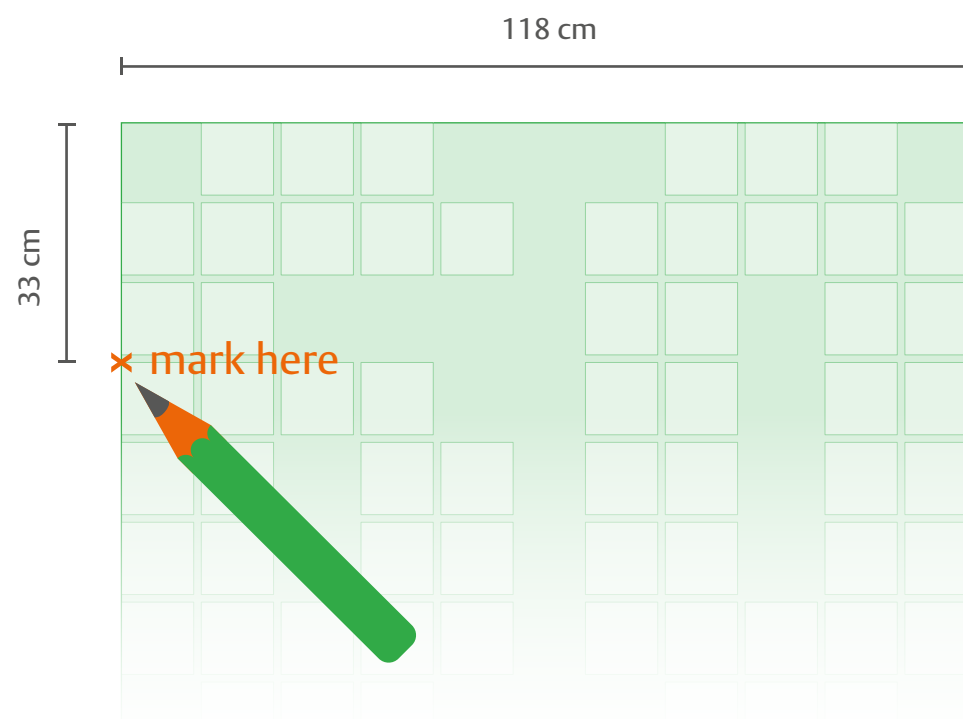

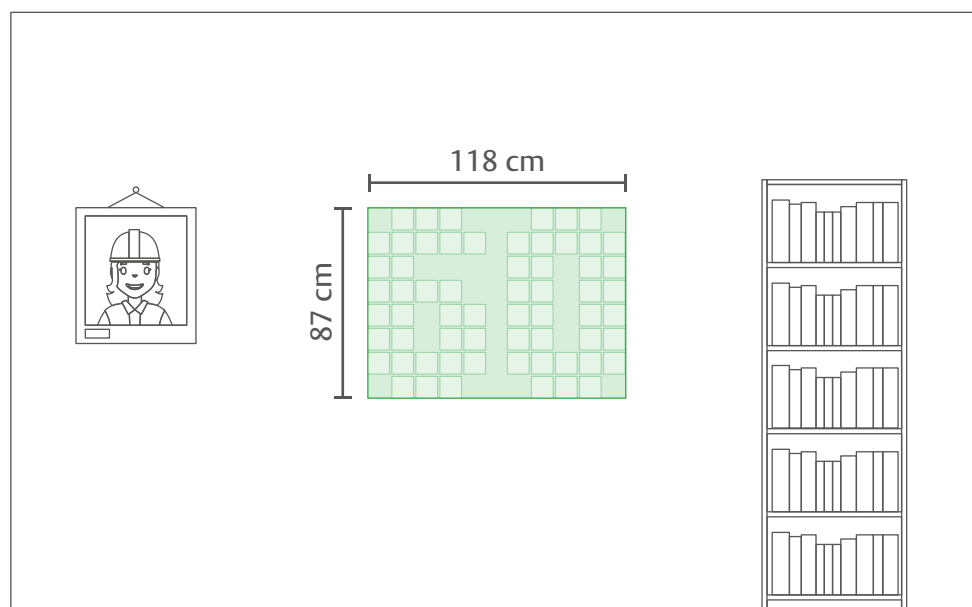

result

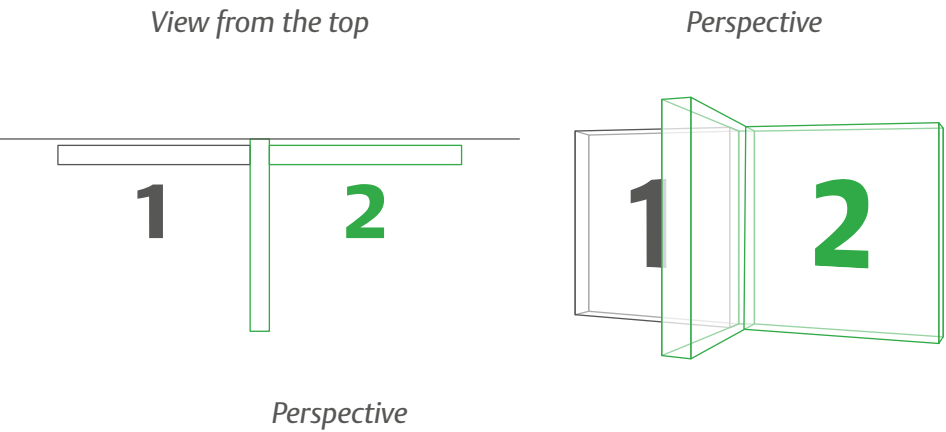

1 Choose a spot on the wall with a minimum of 118 cm width and 87 cm height.

2 Starting at the upper left corner, go 33 cm downwards and mark a small dot on the wall.

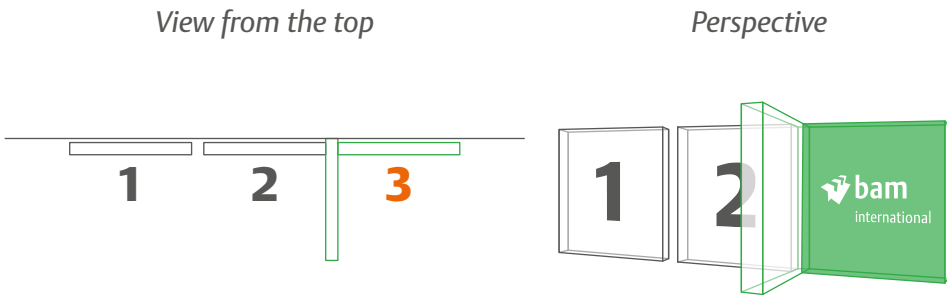

3 The small dot you have marked is the starting point. Take the spirit level and a portrait tile. Remove the tape from the back of the tile. Position the tile so that it is level, with the top left of the tile on the mark.

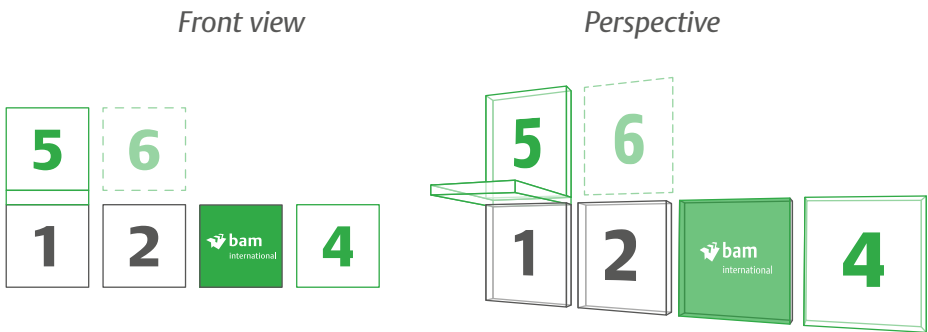

4 Take two new portrait tiles. Hold one vertical to the tile already placed and stick the next one adjacent to it on the right-hand side.

5 Now take the 'BAM International' tile and place it in **position 3** (in the same way as **step 4**).

6 Place a portrait tile at **position 4** in the same way. In this way, place a portrait tile above **1** and **2**.

7 **Align tile**
Carry on positioning the portrait tiles according to the sequence. Place the preset tiles like shown in the example on the first page. Note the **orange** numbers.
